A large, detailend and permanent print

The mega laser printing technique is a supersized version of the laser engraving we already offer. The laser burns away the top layer of a product and creates a subtle, three-dimensional effect. With some of our aluminium and stainless steel bottles, the top layer is coloured and the engraving exposes the metal colour underneath. This contrast makes the logo stand out even more.

Better price. Better quality.

What are your benefits?

✓ Lower prices

Spectacularly low prices in comparison to the normal 'digital' print techniques.

✓ Better results

Impressive print quality, because white is always printed underneath. PMS colours will also be more colour accurate.

✓ Suitable for 'Name it'

Personalize the items with different names.

✓ Best choice

Improve conversion on your web shop by making the choice simple for your customers because you only have to offer one print option.

We offer personalization beyond your company name

We print individual names on each giveaway. Personalized items are kept longer, used more, and are hygienic too. Make it unforgetable. Make it personal!

How ecological is an item really?

Just look at the label. It tells you if an item is made of 10–30%, 30–60%, or over 60% ecological materials. Bamboo, wheat straw, RPET, cotton, or any of the other natural or recycled materials that are environmentally friendly. This is completely unique in the market!

Sustainable products

But there is more to helping the environment than choosing eco materials over plastic. Our assortment also includes clever solutions so we can all make small changes in our daily lives. Think of stainless-steel drinking straws, solar-powered power banks, shower timers, and much more.

Green Impression

15

Wood

Wood is a renewable resource. It is one of the most environmentally friendly materials. While the trees grow they absorb carbon dioxide and produce oxygen. Pine is the most sustainable as it is a fast growing tree. Wood is durable and gives the product a natural look.

Bamboo and bamboo fibre

Bamboo is a type of wood that is especially eco-friendly since it is a natural resource that renews quickly. Bamboo regrows extremely fast, is naturally pest resistant (no pesticides needed), and requires less water to grow than other plants. Bamboo fibre is a versatile material suitable for making both drinking cups and fabrics and is quickly biodegradable.

Wheat straw

Wheat straw is made of the leftover stalks after the wheat grains are harvested. When treated as waste, the stalks are burned, which leads to air pollution. When reclaimed, the stalks are an environmentally friendly material as they come from an extremely efficient, renewable resource in the food chain. Mixing wheat straw with plastic creates a sturdy material that requires far less plastic to make.

Cork

Cork is harvested only from the bark of the cork tree, meaning that the tree itself is not felled for the production of cork products. The tree simply regrows its bark, making cork a material from a highly renewable resource. Cork is both recyclable and biodegradable, meaning there is no polluting waste.

Jute

The outer stem and skin of the jute plant are used to make jute: a hard-wearing material that is recyclable, biodegradable, and compostable. The jute plant is ready for harvest in as little as 4 to 6 months and has a high crop yield, making it a very efficient resource. It requires no pesticides or fertilization and even enhances soil fertility for future crops.

Cotton

Cotton is a natural and sustainable resource. After harvesting, most of the cotton plant is used, not just for the production of cotton, so there is little waste. On top of that, products made of cotton are biodegradable.

Recycled paper

The production of paper requires a lot of water, which is considered a strain on the environment. Paper products should not go to waste but be recycled instead, which saves on energy and water consumption, and reduces waste.

Coffee grounds

Across the world people drink around 400 billion cups of coffee annually. Coffee grounds are a byproduct of every single cup of coffee brewed. Rather than letting tonnes of coffee grounds go to waste
every single day, the material can be recycled into useful products. This reduces global waste and puts
no extra strain on resources.

Stone paper

Stone paper is a new alternative to paper made from wood pulp. It is by definition not real paper, but a paper-like material made from calcium carbonate and polyethylene, which makes it water and tear resistant as added bonuses. The production of stone paper uses no water, unlike the copious amounts of water used for making paper from wood pulp, which is why stone paper is a more ecological alternative.

PLA

PLA is short for Polylactic Acid, a type of polyester, which doesn't sound very "green". But PLA is made from renewable resources like corn starch and sugar cane and it is a quickly biodegradable material

RPET

Recycled PET, or RPET, saves on the use of fossil energy. Production of RPET emits 70% less carbon dioxide and uses 90% less water than polyester. Instead of polluting the oceans, millions of throwaway PET bottles are recycled into new products.

Linen

Linen is made from flax plant fibres. The flax plant requires little water to grow; only rainwater, no additional irrigation. It takes little energy to process flax and the entire plant is used, leaving no waste. Linen is strong, so it is long-lasting, but the product is also both entirely biodegradable and recyclable.

THE BEST PROMOTIONAL PRODUCT CAN BE JUST A 'SIMPLE' PEN

The promotional pen has always been a powerhouse in brand awareness. It's the classic giveaway that nobody says 'no' to. We have selected the best brands for you. Are you looking for a luxury pen set, a pen with touchscreen compatibility, or a laser engraved pen? We have the one for you.

PARKER MEANS BUSINESS

History was literally written with a Parker pen. In 1945, General Dwight D. Eisenhower signed the surrender of Germany with a Parker 51, ending the second World War. But mostly Parker would influence the history of the pen itself. With inventions that prevented pens from leaking, and quick-drying ink that required no blotting. As well as with the iconic advertising stunt of dropping a Parker pen out of an airplane; the ultimate drop test to show Parkers withstand cracking

STYLE, COLOUR CHOICE AND QUALITY

The pen is the quintessential promotional giveaway. But it wasn't always like that. In the early 1970's, Stilolinea founder Piero Chicco was one of the first to see the potential of the pen as a tool for brand awareness. As such, a little bit of history was written.
